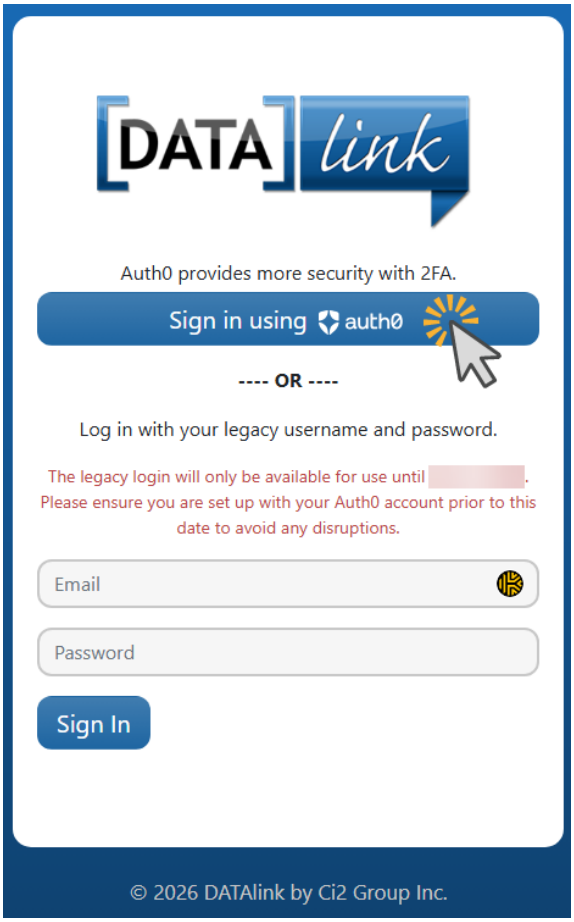
4. Configure 2FA on your device, enter the one-time code and click **Continue** 5

How to Sign in using Auth0

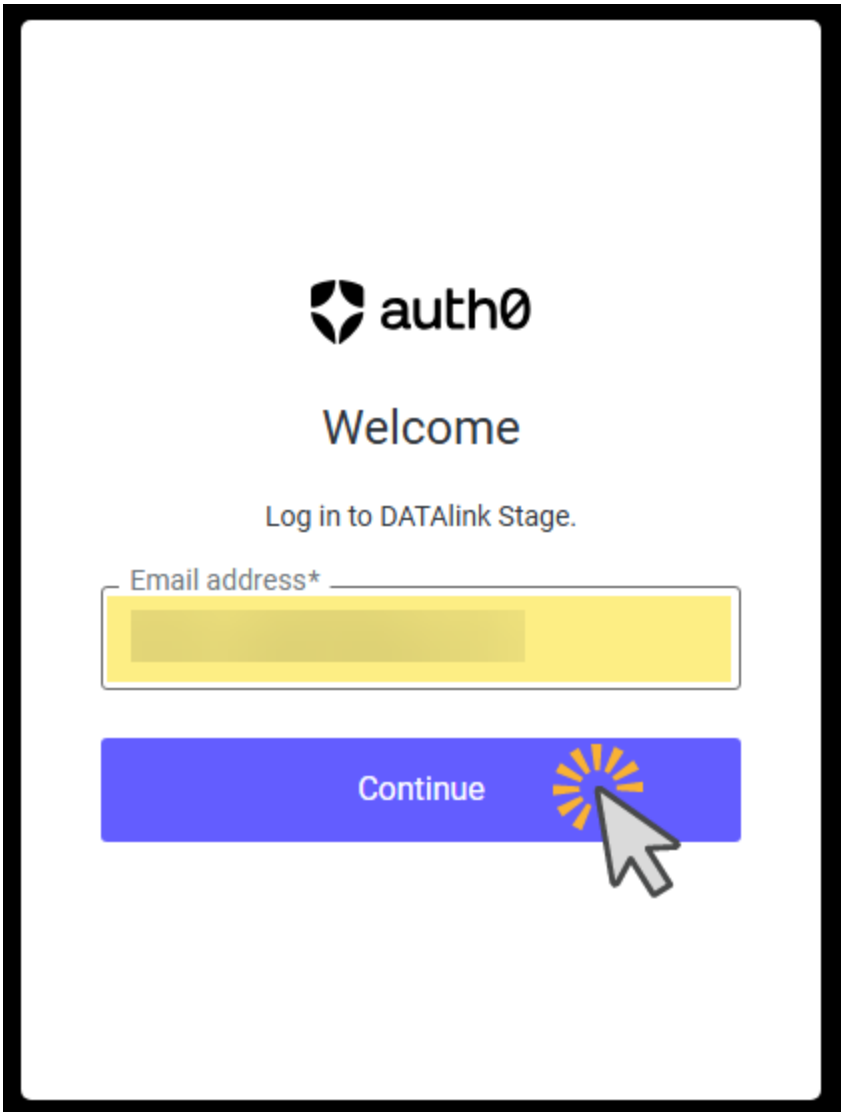
Note: If your password is changed via the Admin screen, then your password is also updated in Auth0.

Your current username/password will work until Auth0 is enforced, so use your legacy username/password until you have time to configure Auth0.

1. Click Sign in using auth0

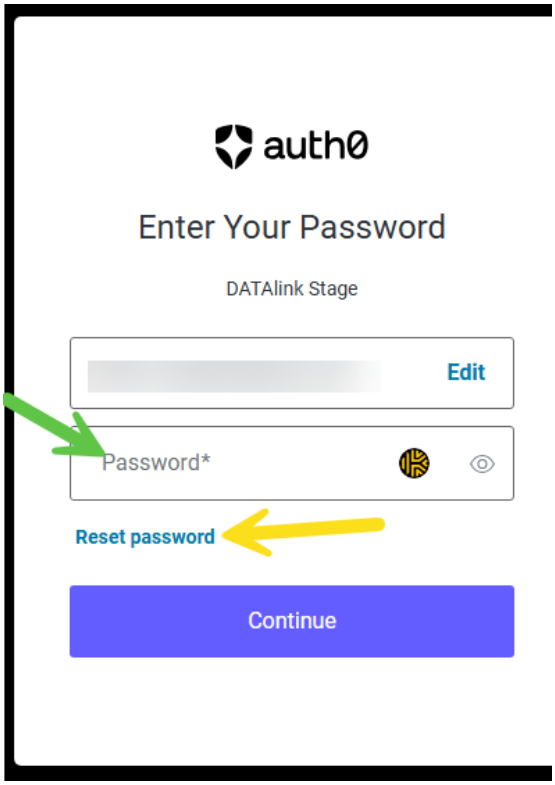


2. Enter your Email address and click **Continue**



3. Enter your password

If you have a password that has been updated since August 19, 2026 via the Admin page, enter your password and click **Continue** and proceed to step 4; Otherwise click **Reset Password** and proceed to step 3a.



3a. Click **Reset password**
3b. Enter your email address
3c. Click **Continue**

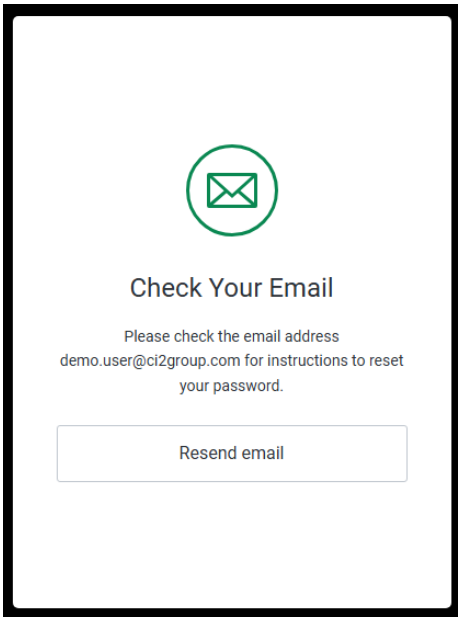
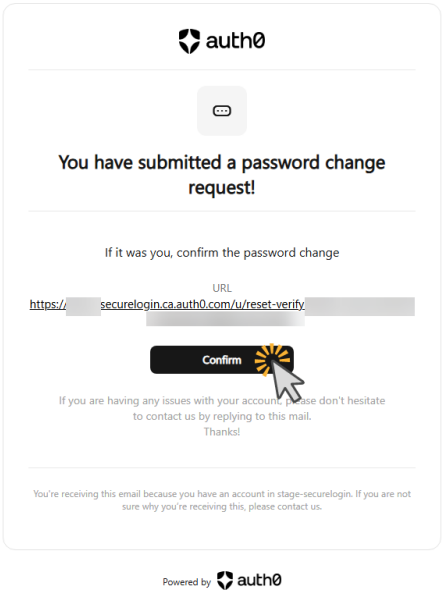
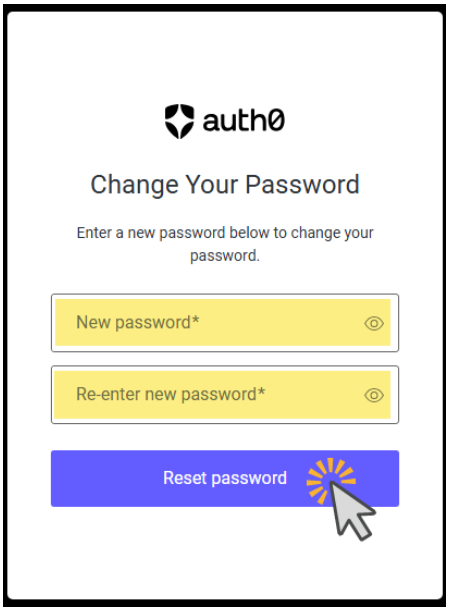
3d. Check your email



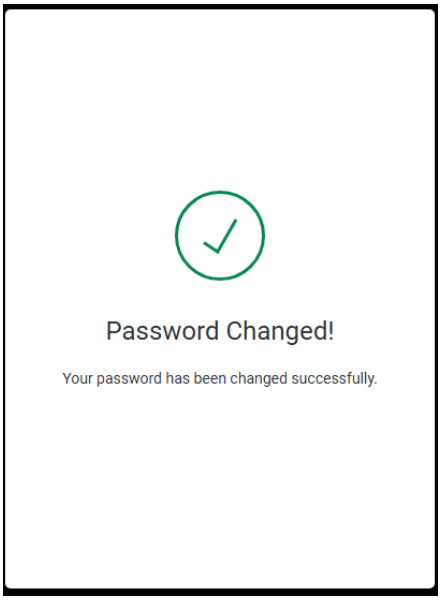
3e. Check your email and click the Confirm button



3f. Enter your new password, confirm it and click the **Reset Password** button

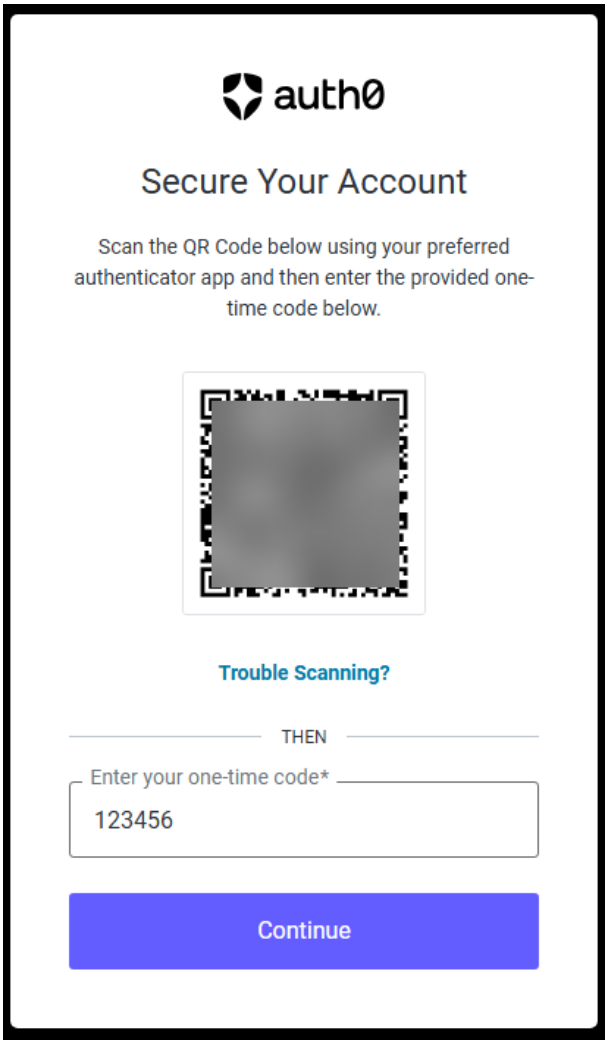


3g. Close the tab and reopen DATAlink.



4. Configure 2FA on your device, enter the one-time code and click **Continue.**

   Any Authenticator app works (Microsoft Authenticator, Google Authenticator, etc.), we recommend Microsoft Authenticator if you don't have one. The desktop-based authenticator app works for users without a smartphone.



5. You will be logged into DATAlink
6. If you see an Oops page, click the **Return to the home page** button

Congratulations, you have set up your Auth0 account!
