

## Background:

With the end of the HOMES system, Parent Links across Alberta were up against a challenge: Being asked to regularly report on a minimum data set AND finding the right system to use.

## What We Did...

Five Parent Link Centres formed a strategic group and partnered with a successful, Calgary internet development firm.

Through our meetings, discussions and planning we created an “easy to use” tracking system for Government reporting!

**Contact us today to join!**

**Initial Investment:**

**\$4995**

\* yearly fee: \$1000 (includes 3 satellites)

*The system was built by Ci2 Group inc.  
who has been in business for over 20 years.*

**Is your  
Parent Link Centre  
having problems keeping  
track of your  
government  
reporting?**

**DATAlink is Your Solution!**

An online system created with the partnership of 5 Parent Link Centres:

- Family Connections Parent Link Centre Calgary
- Bow Valley Parent Link Centre
- High River & District Parent Link Centre
- Western Rocky View Parent Link Centre
- Barons – Eureka – Warner FCSS Coaldale

*DATAlink is a strategically designed system envisioned by the people who use it and created in partnership with experienced web-developers who crafted it.*

### Easy to Use!

The new DATAlink system was designed to be easy-to-use... period. The previous system was converted to try to work with the Parent Link / Government requirements. This new system has been exclusively designed to meet this requirement.

### Timesaver!

The system dramatically reduces the time required to track program data. Kim Krawec of the Western Rocky View Parent Link Centre - Cochrane has noticed the data input times cut in half! It also keeps track of the March year end and eliminates the need to discharge families. You don't have to re-enter them either... they are there waiting for you!

### Secure & Trusted

The DATAlink system is stored in a secure data-centre equipped with redundant power source, off-site backups and modern security. All the traffic is encrypted to protect *your* information.

### Adaptable

There are plans for future advancements and improvements. The system can also be adapted to new government requirements if and when they appear.

**NO DISCHARGE OR RE-ADMITTING!  
It's Automatic!**

*There's room for you too! DATAlink has been running successfully since 2011 and we are inviting other Parent Link Centres to use this incredible system!*
